How to Mount Different Tools

General Mounting Steps:

1. Press shaft lock button
1. Loosen collet nut
2. Insert tool (bit/accessory)
3. Tighten nut properly
4. Check for firm fitting

Special Mounting (Cutting Disc):

1. Fix disc on mandrel using screw
2. Tighten properly
3. Insert mandrel into machine
4. Lock and tighten

Mount Extension (Flexible Shaft):-

1. **Switch OFF the machine**

    - Ensure power is disconnected

2. **Remove front collet nut**

    - Press shaft lock button
    - Unscrew the front cap completely

3. **Attach flexible shaft to machine**

    - Insert shaft connector into front
    - Screw the shaft head tightly onto machine

4. **Tighten properly**

    - Ensure no looseness
    - Shaft should be firmly connected

5. **Insert tool into shaft handle**

    - Open front of flexible shaft (like normal collet)
    - Insert required bit (drill, polishing, etc.)
    - Tighten securely

6. **Test before use**

    - Run machine at low speed
    - Check smooth rotation

Safety Instructions

1. General Safety

- Use tool only for intended applications
- Follow all instructions before use
- Do not use unsupported accessories

2. Speed & Tool Safety

- Use accessories rated for correct speed
- Ensure proper size and fitting
- Avoid damaged or worn tools

3. Mounting Safety

- Insert tools fully into collet
- Tighten securely before use
- Test at high speed for 1 minute

4. Personal Safety

- Wear safety goggles and mask
- Use gloves if required
- Protect eyes from flying particles

5. Work Area Safety

- Keep others at safe distance
- Clamp workpiece properly
- Do not hold small objects by hand

6. Handling Safety

- Hold tool firmly with both hands
- Keep wire away from rotating parts
- Do not place tool until fully stopped

7. Electrical Safety

- Avoid contact with live wires
- Use insulated grip surfaces
